

# PS STACKER

The HEIGHTS PS range of automated plate stackers are available in three sizes (70 / 85 / 125) and are recommended for customers with a medium throughput.

Their compact design gives a small footprint, ideal for where space is an issue.

The adjustable height and angle allows the PS Stacker to be used with processors and processor-less technology connecting directly to the exit of a CtP system.

## IN SUMMARY:

- ◀ Compact design and footprint
- ◀ Variable belt speed
- ◀ Variable stack speed
- ◀ Capacity of up to 60 plates
- ◀ Adjustable transfer height and angle (from horizontal to maximum 23°C)
